EXAMINER'S ACTION

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group 1300, Art Unit 1307.

Applicants' Amendment filed 9/6/31 and applicants' Supplemental Amendment filed 11/5/31 have been fully considered and they are deemed to be persuasive to overcome the previously applied rejections. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are newly applied. They constitute the complete set presently being applied to the instant application.

It is acknowledged that applicants have copied claims and proposed a count along with a request for an interference. The potential declaration of an interference will be deferred until such time as allowable subject matter is indicated in the instant application.

35 U.S.C. § 101 reads as follows:

"Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title".

Claims 14, 26, 29, 40, 41, and 44-60 are rejected under 35 U.S.C. § 101 because the instant disclosure lacks both the necessary diagnostic and prognostic data to support the claimed diagnostic and prognostic utility. It is noted that several statements are given in specification as to the value of the

instant invention with regard to said utility. Due to the well known unpredictability of cancer diagnosis and prognosis, clear clinical data is required to support said utility. Additionally, the instantly disclosed cell line data is insufficient to support in vivo diagnostic and prognostic utility. See MPEP 608.01(p), part A, subsection directed to 35 U.S.C. 101.

Claims 14, 26, 29, 40, 41, and 44-60 are allowable over the prior art of record. The Examiner suggests that nucleic acids having the disclosed sequence may be allowable subject matter.

No claim is allowed.
